For Immediate Release 10/03/13

TechSource Awarded Technical, Analytical, Programmatic, and Integration Support Services for the Department of Energy, National Nuclear Security Administration Office of Research and Development.

TechSource, as Team Lead of the Enterprise-Wide Technical and Engineering Support Alliance (E-TESA), is pleased to announce it has been awarded a Technical, Analytical, Programmatic, and Integration Support Services Contract for the Department of Energy, National Nuclear Security Administration (NNSA) Office of Research and Development (NA-113).

Under this Performance of Work Statement the E-TESA Team will provide technical, analytical, programmatic, and integration support including technical analyses and assessments to support program implementation and integration of the Defense Science Campaign. Under this task, direct personnel and technical experts will support ongoing mission-critical activities designed to meet the goals of the Stockpile Stewardship Program and increase collaboration and coordination among the NNSA Defense Programs laboratories and international collaborations.

The Defense Science Program's mission is to develop the scientific tools and understanding required to assess and certify the nuclear stockpile through a scientific approach that does not employ underground nuclear testing, while at the same time maintaining the ability to perform an underground test when called upon to do so. The major contractors who perform work are the Sandia, Livermore, and Los Alamos National Laboratories, and the Nevada National Security Site. In addition, an academic alliance program is part of the Office of Defense Science's portfolio.

This is the ninth award for Team E-TESA, led by TechSource, under this NNSA BPA. The award is valued at \$7,466,220. To date, Team E-TESA has been awarded a total contract value of \$33,247,834. E-TESA continues to be the most successful in the number of contract awards and highest contract award total among all eight CTA Teams.

For more information about the E-TESA Team and/or this specific technical services award, please contact Jim Rhone at 301-515-5819/jrhone@techsource-inc.com or Don Trost at 301-515-1344/dtrost@techsource-inc.com.
