TechSource Awarded Technical Support Services for Directed Stockpile Work (DSW) Management Support Systems, Analyses, Development, Operations and Maintenance, and Inventory Reporting (NA-122)

TechSource, as Team Lead of the Enterprise-Wide Technical and Engineering Support Alliance (E-TESA), is pleased to announce it has been awarded a Technical Support Services Contract for the Department of Energy, National Nuclear Security Administration (NNSA) Office of Nuclear Weapons Stockpile (NA-122).

Under this Performance of Work Statement the E-TESA Team will provide technical support services for Defense Programs Nuclear Weapons Directed Stockpile Work (DSW) Forecasting and Analyses, Nuclear Weapon Stockpile Requirements and Planning, and Surveillance, which requires frequent access to and expert knowledge of highly classified nuclear weapons databases.

NA-122 is responsible for the direction, management, and maintenance of the nuclear weapons stockpile DSW and for developing and implementing Defense Programs' requirements including materials, systems and component tracking; budget planning, policies and procedures; and production program control.

In addition, NA-122 also develops, analyzes, and communicates requirements and direction for stockpile life cycle activities, strategic materials, and the necessary production and electronic information management capabilities. NA-122 integrates and coordinates the planning, budgeting, and evaluation of stockpile operations and stockpile services activities to ensure national defense requirements are properly understood and met. The Office is also responsible for maintaining the Tritium Simulation System and performing associated tritium analyses.

This is the tenth award for Team E-TESA, led by TechSource, under this NNSA BPA. The award is valued at \$1,919,345.40. To date, E-TESA has been awarded a total contract value of \$35,167,179.40 making the Team the most successful, in the number of contract awards, amongst all CTA Teams.
