## **TechSource Providing Expertise through Newly Awarded Savannah River National Laboratory Management and Operating Contract**

**Los Alamos, NM.** TechSource, Inc. is pleased to announce it is part of the Battelle Savannah River Alliance, LLC (BSRA) team to which the U.S. Department of Energy (DOE) Office of Environmental Management (EM) has awarded the Savannah River National Laboratory (SRNL) Management and Operations contract (M&O).

The \$3.8 billion cost plus award fee contract scope includes operations and maintenance of SRNL's nuclear and non-nuclear facilities. The contract also entails DOE missions support in environmental management, national security, science discovery, energy security, and legacy management activities. The SRNL M&O contract consists of a five year base period with option periods to five-years.

BSRA is led by and wholly owned by Battelle. BSRA's team includes Clemson University, Georgia Tech Research Corporation, South Carolina State University, University of Georgia Research Foundation, Inc., and the University of South Carolina as well as Longenecker & Associates, and TechSource. Under this newly minted contract TechSource will provide technical support involving plutonium science and engineering, capabilities augmentation, and regulatory analysis.

"We are honored to be part of this exceptional team and have the opportunity to support the DOE EM mission. By selecting BSRA for this critical role, DOE EM has ensured SRNL will have the partners it needs to support expanding research and development involving environmental management, national security, science discovery, energy security, and legacy management. I completely agree with Battelle's Ron Townsend that, 'Our team offers an exciting, compelling vision for the future of SRNL and provides DOE a leadership team that will deliver with excellence.' We are looking forward to working with the BSRA team on this critical DOE mission," said V. Brian D'Andrea, Chairman and CEO of TechSource.
