TechSource Welcomes Public to Albuquerque Office Grand Opening

Albuquerque, NM – An open house was recently held to welcome clients, colleagues, and employees into TechSource's new office space in Albuquerque. The open house was attended by many associates eager to see the space that has been in the works since the beginning of 2021. Festivities included a ribbon cutting, tours of the office capabilities, partaking in a delicious work of art by caterer *Eatentions*, and reconnecting with people. The celebration offered an opportunity to connect with people in a way we have not been able to in years.

"We are thrilled to establish ourselves in the Albuquerque area. Being able to welcome people into our new space has been a real pleasure. We look forward to investing in Albuquerque with our clients, our industry partners, and local community with continued partnership and engagements" -Kevin Bovee, Managing Director of Albuquerque Program Management Office (ABQ PMO)

The state-of-the-art space was designed to accommodate the company's growing business base, colocate to the emerging clients, and provide an advanced collaboration space for people local to Albuquerque to engage in national projects. TechSource's, Kevin Bovee, was appointed the Managing Director of the ABQ PMO in January 2021 and curated a team to bring the concept to life. TechSource's then Executive Vice President, Don Trost, and Vice President, Barry Shulock, worked tirelessly to find the space during the peak of the pandemic, and Corporate Architect, Dana D'Andrea, created the innovative design that would best suit the diverse needs of a growing company.

Since opening its doors in June, the ABQ PMO has become a home base for projects and clients including those with the National Nuclear Security Administration, Sandia National Laboratories, and the Air Force Nuclear Weapons Center. The new office is also home to the Weapons Knowledge Preservation and Transfer initiative: an industry leading knowledge management and professional development initiative.

About TechSource

Founded in 1997, TechSource, Inc. is a science and engineering consultancy comprised of over 500 senior-level engineers, scientists, and leaders from the national laboratories, Federal technology programs, and the nuclear industry.
