Three Years In a Row! TechSource Earns 2023 Top Workplaces New Mexico Award

Los Alamos, NM. TechSource, Inc., a top tier provider of science and engineering expertise, has been named a 2023 Top Workplace in New Mexico by the *Albuquerque Journal* for the third year in a row. We are honored to be a repeat winner of this prestigious program.

“Our people are the best in the business. They routinely exceed expectations and deliver top-tier, sustainable results which drives every aspect of our success,” said Curtis Christensen, Vice President and Managing Director, Los Alamos Program Management Office. “We have worked hard to create a workplace environment that empowers our employees, ensures they feel valued, and are well rewarded for their work. It is because of them we achieved this tremendous recognition.”

The Top Workplace program conducts voluntary and anonymous employee surveys through a third-party advanced analytical platform, Energage, to detail employee engagement in 12 cultural categories and recognize the top workplaces based on the results.

TechSource scored in the top 25% of employers in 11 of the 12 cultural categories and the top 5% in Employee Appreciation, Meaningful Work, Leaders-In-The-Know, Work-Life Balance, Company Direction, and Operating by Strong Values categories. TechSource also placed in the top 1% of companies nationwide where employees feel valued and would recommend working at their employer to others. “At TechSource, we are committed to fostering an environment where everyone can excel and be their authentic selves. Nothing is more important to us than our employees knowing that they are appreciated and this feedback from our employees is particularly meaningful,” TechSource Vice President, General Counsel, and Human Resources Director, Barry Shulock, added.

To learn more about TechSource’s exceptional workplace culture check out our Careers page at TechSource-Inc.com/careers. We are always looking to expand our cohort.
