FOR IMMEDIATE RELEASE

July 24, 2023

TechSource Selected as One of New Mexico's Fastest Growing Companies

Los Alamos, NM. TechSource, Inc. has been selected as one of New Mexico's 2023 Flying 40 awardees by the New Mexico Technology Council, a member-driven association working to promote the growth and success of New Mexico's technology business sectors. It is a great privilege to be recognized by the council and to be included in this group outstanding New Mexico based companies for the eleventh time.

"TechSource is celebrating our 25th anniversary and this award is a fantastic anniversary present," shared Brian D'Andrea, Chairman and CEO of TechSource, Inc. "We are fortunate to have experienced a year over year increase in the demand for our nuclear science and engineering expertise and services. This is a direct reflection of our people's hard work and dedication to our customers' mission and delivering implementable solutions, services, and hard-to-find nuclear-centric expertise. Our people clearly deserve the credit for this award, and I am confident they will continue to deliver growth here in New Mexico and around the nation."

J. Quinn Wingerd, Managing Director, Albuquerque Program Management Office, shared his pleasure in receiving this prestigious award. "We are honored to be recognized as a 2023 Flying 40 Awardee. We recently expanded our New Mexico footprint by opening a state-of-the-art office in Albuquerque that, along with our Los Alamos office, positions TechSource to continue to grow our capabilities and capacity, expanding opportunities in the New Mexico technology community. We look forward to continuing to deliver innovative and implementable results for New Mexico."

In addition to the Flying 40 award, TechSource was also recently awarded a "Top Workplaces" award for the third time by the Albuquerque Journal in 2023. To learn more about these awards, read our [Press Releases](#).

About TechSource

Founded in 1997, TechSource, Inc. is a science and engineering consultancy comprised of over 500 senior-level engineers, scientists, and leaders from the national laboratories, Federal technology programs, and the nuclear industry.
