TechSource Announces Strategic Investment in Vibrant Corporation to Advance Non-Destructive Testing Technology

Los Alamos, NM. TechSource, a leading science and engineering solution provider for the National Security Enterprise, is proud to announce its strategic investment in Vibrant Corporation as part of their Series B funding round. This collaboration marks a significant step in advancing the future of non-destructive testing (NDT) technology and reflects TechSource's commitment to innovation in critical technology sectors. Vibrant, founded in 2006, has pioneered Process Compensated Resonance Testing (PCRT), a patented ultrasonic resonant inspection technology that offers faster, more accurate defect detection while reducing hazardous waste streams, green house gas emissions, as well as labor and material costs. The investment aims to fuel Vibrant's growth, expand its market reach, and enhance its technological capabilities.

"TechSource is committed to fostering innovation that secures and advances critical industries," stated J. Quinn Wingerd, Vice President and Managing Director of TechSource's Albuquerque PMO. "Our collaboration with Vibrant aligns seamlessly with our mission to support transformative science and engineering solutions. I am eager to contribute as a member of Vibrant's Board of Directors."

Key objectives of this investment include expanding partnerships with major aerospace clients, expanding PCRT's reach to new customers and markets, and scaling operations to meet rising demand in the defense, automotive, and power generation sectors. "Vibrant epitomizes the flawless blend of advanced technology meeting robust industry demand," stated Curtis Christensen, Vice President and Managing Director of TechSource's Los Alamos PMO. "This strategic investment fuels our mission, empowering Vibrant to leverage TechSource's scientific and engineering expertise, while unlocking new opportunities and verticals for TechSource."

Together with partners like Advantage Capital, this collaboration underscores TechSource's dedication to fostering long-term success and creating sustainable value for all stakeholders. The future of non-destructive testing is now, and TechSource is excited to be part of Vibrant's journey

About TechSource

TechSource, Inc. a Veteran Owned Small Business is a premier provider of science, engineering, and technology expertise, services, and solutions for over 25 years. We leverage the decades of experience and of each of our 600+ senior-level engineers, scientists, and leaders from the national laboratories, federal technology programs, and the nuclear industry to drive innovative solutions focused on mission delivery in national security domains. For our employees, we offer clear career paths, competitive compensation, and opportunities to learn from world-class mentors. TechSource is a multi-year Top Workplace awardee and was honored this year as honored this year as DOE's Small Business of the Year.
