FOR IMMEDIATE RELEASE

April 9, 2025

Daniel Cheshire of TechSource Named Executive Chairman of the American Lung Association's 2025 Fight for Air Climb Planning Committee

Albuquerque, NM TechSource, a leading provider of science and engineering solutions to the National Security Enterprise, is proud to announce that Daniel Cheshire, Vice President and Deputy Managing Director of the Albuquerque PMO, has been named Executive Chairman of the American Lung Association's New Mexico (ALA-NM) 2025 Fight for Air Climb Planning Committee.

Daniel has set an ambitious goal of raising \$100,000 to support the association's initiatives. Under his leadership, the team has already reached 60% of this target, creating strong momentum toward achieving their mission and creating a meaningful impact in the region.

The American Lung Association is committed to saving lives by improving lung health and preventing lung disease through education, advocacy, and research. ALA-NM is gearing up for the 2025 Fight for Air Climb, an inspiring event where participants will ascend the staircases of the Clyde Hotel in Downtown Albuquerque on Saturday, April 26th, from 10 a.m. to 1 p.m. This fundraising event supports individuals affected by lung disease and honors the dedication of local firefighters across the state. With over 300,000 New Mexicans living with asthma, COPD, pulmonary fibrosis, lung cancer, and other respiratory conditions, the fight for lung health has never been more urgent.

TechSource is deeply committed to community philanthropy and applauds Cheshire's impactful contributions to ALA-NM. "Giving back to the community lies at the heart of TechSource's values," Cheshire remarked. "I'm deeply inspired by the dedication of ALA-NM and its supporters as we unite to raise both funds and awareness for those affected by lung disease in our community."

To support ALA-NM and its mission, donations can be made at <https://www.lung.org/get-involved/ways-to-give/matching-gifts>.

About TechSource

TechSource, Inc. is a premier provider of science, engineering, and technology expertise, services, and solutions for over 25 years.
